

ALDEN KING

Software Engineer (Secret Clearance)

Hartford, CT | (860) 970-5620 | kinga112@yahoo.com | [Portfolio](#) | [LinkedIn](#) | [Git](#)

With 4+ years as a professional **Software and Systems Engineer**, I have efficiently worked to support client needs remotely, validated mission critical naval defense systems, and built cloud infrastructure. I am a quick problem solver, a continuous learner, and bring valuable experience in a multitude of technologies to a fast-paced environment, along with a strong commitment to personal projects and community service.

SKILLS

Programming Languages: Python, Java, TypeScript, Rust, Dart, HTML/CSS, Bash, PowerShell

Libraries & Frameworks: React, Flask, Flutter, Vue, Node.js, Next.js, Tailwind, Zustand, Electron, Tauri

Tools & Infrastructure: SQL/NoSQL (PostgreSQL, MongoDB), GCP, AWS, Docker, Kubernetes, Git, REST, GraphQL

PROFESSIONAL EXPERIENCE

Gateway Ventures Inc | Groton, CT

Systems Engineer (Secret Clearance) | May 2025 – Present

- Execute rigorous hardware and software integration testing for critical systems aboard Virginia and next-generation Columbia class submarines.
- Verify system compliance against strict NAVSEA guidelines, identifying edge cases and delivering actionable engineering recommendations to optimize system reliability.
- Audit unit testing and system integration procedures to ensure 100% requirement traceability and mission readiness.

Casa Systems | Andover, MA

Software Engineer | Feb 2021 – May 2023

- Led development of a vCCAP solution using Google Cloud and Anthos; engineered automated installations with Python and Bash, significantly enhancing platform scalability.
- Implemented UI updates for node initialization and simplified network setup procedures, increasing node creation rates by 30%.
- Leveraged Docker and Kubernetes to streamline deployment processes, reducing deployment times by 30% and bolstering system reliability.

Broad Institute | Cambridge, MA

Software Engineer | Summer 2019, Spring 2020

- Developed an automated ServiceNow ticketing system using ID scans, boosting helpdesk efficiency by 20%- 50%.
- Collaborated on an automation tool to transmit COVID-19 test results to the CDC, reducing manual effort by 75%.
- Automated HR onboarding communications using SMTP protocol and Flask HTML templates, eliminating manual email dispatch.

PROJECTS

Cliqu3: Developing a decentralized desktop messaging application using Rust and Tauri/React. Leverages XMTP, WalletConnect, and Iroh P2P protocols to facilitate secure, wallet-to-wallet community channels.

MAIL-E: Built a Python and React desktop mail client integrated with IMAP for secure Gmail/Outlook authentication, utilizing EEL to bridge high-performance backend processing with a dynamic front-end UI.

Excursia: Designed a Flutter mobile app utilizing custom algorithms to randomize coordinate paths, generating unique, real-time routes for users.

EDUCATION

Wentworth Institute of Technology | B.S. in Computer Science, Applied Math Minor | Dec 2020

VOLUNTEER

Volunteer | Costa Rica Mission Trip (San José, Costa Rica) | March 2023 – 2025

Volunteer | Anchor Food Pantry (Swampscott, MA) | Sep 2023 – Feb 2024
